JOB PRINTING
Such as Labels, Cards, Tickets, Programmes,
Handbills, Posters, Blanks, Pamphlets, etc.,
Done at this office neatly and expeditiously,
on terms adapted to the times.

MASSILLON BUSINESS CARDS.
BANKS.

Union National Bank,
MASSILLON, O.
CLEMENT RUSSELL, WM. McCLYMONDS,
President. Cashier.

First National Bank,
Erie street, Massillon, O. \$250,000 Capital.
I. STEESE, Pres.; S. HUNT, Cash.

ATTORNEYS.
F. E. BALDWIN, Attorney-at-Law, Mas-
sillon, Ohio—Office in Opera Block. Con-
sultations promptly made, and all business
carefully attended to.

P. H. FOLGER, Attorney-at-Law, Massil-
lon, O. Office over Red's store.

ANSON PEASE, Attorney and Counselor at
Law. Office over First National Bank on
Erie street.

PHYSICIANS.
M. M. CATLIN, Homeopathicist,
Successor to Dr. D. G. Curtis.
Office above Humberger & Son's Block; resi-
dence, corner of Hill and Oak streets, Mas-
sillon, O. 4141

Dr. H. GEROLD, Opera House, Erie st.
Residence on North street, one door west
of M. E. church. Massillon, O. Reference,
Prof. H. R. Storor, Boston, Mass.

A. METZ, M.D.—Office and residence on
North street, Massillon, O. Office hours 7 1/2
a. m. to 12 m., and 3 p. m. to 8 p. m. To se-
cure prompt attention orders for morning
visits must be sent in by 9 o'clock, and for
afternoon visits by 2 o'clock.

T. J. REED, M.D. Office corner of Main
and Hill streets. Office hours 7 to 9 o'clock
a. m., 12 to 2, and 6 to 8 o'clock p. m.

A. R. SOWETS, Physician and Surgeon,
Canal Fulton, O.

Dr. A. HOUTZ, Physician and Surgeon, Can-
al Fulton.

Dr. A. W. RIDENOUR, Massillon, Ohio,
office on Main street, over P. Hookway's
Clothing Store. 330 1/2

DRUGGISTS.
JOSEPH WATSON, Druggist, Main street,
keeps constantly on hand Oils, Balms, Tar
ush, Glass, Drugs, Medicines, Brushes and
Wall and Window Papers, &c.

EDWARD KACHLER, Druggist and Book-
seller, Main street, dealer in Books, Drugs &
Medicines, Oils, Paints, Varnish, Glass Pa-
stern, Patent Medicines, School Books,
Wall and Window Papers, &c., Stationery.

DENTISTS.
E. CHIDESTER, Dentist. Office over Hum-
berger & Son's store, Main street. All op-
erations in dentistry warranted, and terms as
low as those of any other dentist in Stark
or Wayne county. Gutta serena or hard
rubber work done in the best style with
Hayes' celebrated High Pressure Vulcanizer.

A. H. JOHNSON, Surgeon Dentist. Office
over Coara's hardware store, Main street.
Work warranted second to none in Ohio for
beauty, comfort, and durability—from one
to an entire set, on gold, silver, platinum or
vulcanite base. Charges moderate.

GROCERIES.
H. K. DICKEY & CO., Wholesale Grocers &
Tobacco Dealers. Sell to the trade only.
Exchange Place, Massillon.

H. MORGENTHAU, Jr., & R. BREED,
Groceries and Provisions—successors to R.
R. Atwater & Co., Main street.

MISCELLANEOUS.
LUMBER
MANUFACTURED TO ORDER.
Oak, Beech, Maple, Walnut, Elm—
Also Fire Wood always on hand, delivered
to all parts of the city.
Leave your orders at my office, Massillon
Excelsior Works—213 JAS. BAYLISS.

Smith Yard—M. A. BROWN is prepared
to fill bills at wholesale prices, freight ad-
vance on short notice. Full stock of Pine Timber
and Lumber, Flooring, Siding, Ceiling, Barn
Boards, Battens, Shingles and Lath, in short
every thing in the lumber line. Opposite
Massillon depot.

R. R. ATWATER & CO., Forwarding and
Commission Merchants, and Dealers in all
kinds of country Produce. Warehouse in
Atwater Block, Exchange place.

W. F. RICKS & BRO., Dry Goods Mer-
chants, Massillon, O.

MYERS & WILLISON, Manufacturers of
Hubs, Spokes, and Wheel Material for Wag-
ons and Carriages. Planning and Matching
done to order. North end Erie street.

MASSILLON FURNACE—J. P. Burton,
Proprietor—Manufacturer of Foundry Pig
Metal, similar in quality and equal in every
particular to Scotch Pig. Also, Massillon
Coal for sale.

H. FALKE,
Wholesale and Retail Dealer in Dress Silks,
Embroideries, Bonnets, Cloaks,
Shawls, Gloves, Lady's Fancy Goods, Ho-
siery, &c., Main street, 3 doors above Mill,
Massillon, Ohio.

JOHN A. YOUNG, Auctioneer, Is pre-
pared to attend to all calls in his line of
business. His terms are easy, and customers
will find it to their advantage to secure his
services. Inquire at this office. 339 1/2

We invite all to call at Kelley &
Brown's and see what they have new.
No trouble to show goods.

SIMMONS' LIVER
Regulator.
THE symptoms of
LIVER
Regulator.
loss of memory, accompanied with painful
sensation of having left undone something
which ought to have been done. Often com-
plaining of weakness, debility and low spir-
its. Sometimes many of the above symp-
toms attend the disease, and at other times
very few of them; but the liver is generally
the organ most involved. Cure the liver
with

**Dr. Simmons' Liver Regu-
lator.**
A preparation of roots and herbs, warranted
to be strictly vegetable, and can do no injury
to any one. It has been used by hun-
dreds, and known for the last 40 years as
one of the most reliable, efficacious and
harmless preparations ever offered to the
suffering. It taken regularly and persistently
it is sure to cure Dyspepsia, flatulency,
Jaundice, costiveness, sick headache, chro-
nic diarrhoea, affections of the bladder, catarrh
of the kidneys, fever, nervousness, eruptions
of the skin, melancholy or depression
of spirits, heartburn, colic, or pains in
the bowels, pain in the head, fever and ague,
dropsy, boils, pain in the back, &c. Pre-
pared only by
J. C. SIMMONS, Druggist, Macon, Georgia.
And 329 Arch street, Philadelphia, Pa.
For sale by J. KACATER, Massillon, O.
Wholesale by STRONG & ARMSTRONG,
Cleveland, O.
Price, \$1; by mail, \$1.25.

The only place to find the Gibbs &
Co's Plows, Hail and Speed Plows, Jones
Wayneborough Plows and Cultivators,
is at the Massillon Hardware Store,
KELLEY & BROWN.

Jas. T. Brady & Co.,
(Successors to Jones & Co.)
Corner Fourth & Wood streets,
PITTSBURGH, PA.

BANKERS.
Buy and sell all kinds of
Government Securities,
Gold and Silver Coupons.

Six per cent, interest allowed on de-
posits subject to check.
Money loaned on government bonds.
Bonds registered free of charge. 373-1/2

EDWIN JARVIS, Justice of the Peace
Notary Public, and Conveyancer, also
Canal Collector, Massillon, O. Office—At-
water's Block, over Morganthaler & B's
grocery store, next to the canal. 363

MASSILLON IRON FOUNDRY.
KILLINGER & CO.
MANUFACTURERS OF PARLOR HEATING AND
COOKING STOVES.

Plows, Points, Car Wheels, Bolls and
Castings Generally.

STATIONARY AND PORTABLE STEAM ENGINES,
AND CIRCULAR SAW MILLS.

Prompt attention given to repairing Mills,
Engines, and Machinery of all kinds.

IRON BUILDING MATERIAL.
Columns, Caps, Sills, &c., furnished to order.
Office and Foundry, Main st., West of
Canal 255-1/2

JOHN HOSKIN, General Agent for Ohio,
Western Pennsylvania, &c.
Patent Dry Earth Composites in Walnut or
Ash Cases.

Patent Dry Bathing Apparatus for Fixed
Closets or Privies, either Pull-up
or Self-acting.

The Dry Earth Closet is a successful sub-
stitute for the water closet, being cheaper,
less liable to get out of order, and positively
free from odor. Suitable for dwelling house,
sick chamber, merchants' offices, factories,
schools, railroad depots, hospitals, prison
cells, &c., &c. Call and see them at the
Massillon Excelsior Works. 243-1/2

Those who anticipate building can
find Doors, Sashes, Windows, Oil-
locks, Trusses, and other necessary ar-
ticles at Kelley & Brown's, Erie street,
Massillon, Ohio.

T. E. REENONG,
Dealer in Pine Lumber, Slunges, Lath, dis-
solved Flooring and Siding, Bill Lumber
wide and common, Barn Boards, Pen-
cing, Box and Second Pine, which will
be disposed of on very reasonable
terms. Lumber Yard on Erie st.,
opposite Tremont Houe, Mas-
sillon, where I will be glad to
wait on customers who de-
sire anything in the lumber line.

E. D. BOSE,
COAL DEALER.
Office West Side Canal Near Gas Works.
Thankful for former liberal patronage
would respectfully solicit a continuance of
the same. Confident that he can give satis-
faction as he delivers coal but

CLEAN COAL
from the best mines, at greatly reduced rates.
TERMS—POSITIVELY CASH.

A. HARSH,
WHOLESALE DEALER IN
Notions and Fancy Goods,
AND MANUFACTURER OF
Umbrellas and Parasols,
Corner Main and Factory sts, Massillon, O.
Repairing promptly done.

INDEPENDENT.

EXAMINATION OF G. W. LITTLE'S
ARTICLE CONCERNING SUPRE-
MACY OF THE TRINITY.

Our reverend friend admits the
forged text given, but thinks because
such minds as Edwards, Wesley, Mc-
Cosh and others in the faith, believe
the doctrine that it is true. But why
did Newton, Locke, Lordner, Jeffor-
son, Franklin, and Dr. Isaac Watts in
the last years of his life, reject the
dogma? Was a blind faith superior to
the teachings of science? For the
world of science from Humboldt down
repudiates the doctrine. I think men
should not believe or disbelieve be-
cause of these men, but search for
themselves.

Mr. Little intimates that there are
other texts that prove this doctrine
of three in one. I challenge him to
produce another that says "there are
three in heaven, and these three are
one." If he cannot then this is the
foundation brick, and all others are
mere propped to keep the structure up.
But the facts are, there was no early
doctrine in the faith of the early
Christians, until three hundred years
after Christ. It was then brought in
by converts out of the Platonic phi-
losophy, headed by Athanasius, and
through a struggle of half a century,
the Athanasian dogma gained little or
nothing. But the Emperor Constantine
being an Athanasian, the power of
his empire was used against those
who would not accede to the dogma,
and by persecution and martyrdom
they were crushed out. The New
Testament not being compiled till
sometime after the fourth century, and
then in the Athanasian interests, it
was compiled from Athanasian manu-
scripts, many of them re-written from
the early Christians and changed and
construed to suit their doctrines. In
the face of these facts how much re-
liance can be placed on scripture
proof? In my mind only show that the
writers and compilers of the New
Testament were anxious on this point.
Such facts are not taught by seminars
established by creeds; they are
brought to light more and more as
mode a search is carried on in the
history of antiquity. And the fact
that this doctrine was introduced for
the first time among the Christians,
three hundred years after Christ, is
very strong evidence that Christ and
his apostles did not teach it to their
followers. So important a point in
their faith could not have been over-
looked or forgotten, to be re-intro-
duced and enforced in the time of the Em-
peror Constantine.

Mr. Little says: "Is the writer, Pro-
gress, ignorant as to how these ques-
tions should be answered; if ignorant
ought he to pretend to speak wisely
concerning these matters?" Let me
see who is ignorant, and who has
spoken wisely. In regard to the spu-
rious text in 1st John, 5th, 7th, he says:
"This with the aid of a Latinian mi-
nister he has probably done, for this
verse and perhaps half a dozen more
verses, or parts of verses are consid-
ered by scholars as interpolations." He
also brings to light another verse, in
John 3rd Chap. 4th verse; that he says
is an interpolation, and considered so
by a great scholar. He brings this
up to show me that I could disprove
the doctrine of angels, if I could
forget the stories told of their appear-
ing to Abraham, Lot, Jacob, &c. This
is a queer style of defense, never be-
fore tried. But Mr. Little must see
that such statements will not inspire
much confidence in scripture texts to
prove anything. This style of defense
reminds me of Artemus Ward's dis-
cription of a fight he got into once.
He said he took a strong position on
his back, and placed his hair in the
other fellows left hand, then butted
his nose, eyes, and face generally
against said fellow's fist. Artemus
might have won, and it may be Mr.
Little will make a successful defense
in such disclosures. But if I had
called a half dozen spurious texts, and
interpolations to break down confi-
dence in the statements of the New
Testament, many of our readers would
think such assertions were false, be-
cause they came from an infidel. I
hope Mr. Little will keep right on, he
is doing good service in showing us
how to answer these questions wisely
and knowledgeably. But he says this doc-
trine has withstood the assaults of
writers for eighteen centuries. If
such statements as this could prove
anything, then the religion of the
Chinaman is most certainly truer than
any other religion in the world—and
we could say the same of the religion
of the Hindoo. In spite of all the
money and effort spent in propagating
this doctrine, they have been unable
to keep the Chinaman's religious wor-
ship and the construction of their Joss
Houses out of our own country.

REFORM AND ITS TRUE METHOD.
The venerable Peter Cooper, in a
recent article, utters the following
golden words:

"Reform to be of any permanent
value, must be based on personal vir-
tue, not force; and it seems to me that
the millennium will not be far off when
each individual shall set about reform-
ing himself, rather than society, and
conforming his life to the great law of
loving God and his fellow men."

The individual is at the basis of
everything, and true reform must work
its way up from individuals through
society. Law cannot force men to be
truly virtuous, and they who depend
upon it will be surely disappointed.
But while this is so, the law may, and
should, restrain all these manifesta-
tions of vice which may endanger the
freedom and peace of society. The
law cannot reform a violent, outrage-
ous temper, but it can say to a man
that if he allows that temper to lead
him into a trespass upon the rights of
his neighbor he shall be punished for
it. The law cannot make a temperate
man out of an intemperate one, but it
can say to him that if he becomes
drunk upon the streets so as to endan-
ger the public peace and quiet, he
shall be subject to arrest and imprison-
ment. In a word, the proper function
of law is to preserve freedom of soci-
ety. The restorative and reformatory
influence must come from other
sources. The passions and appetites
of men are the great sources of vice.
The true method of reform is to reach
and influence the man that he shall
himself hold all these appetites and
passions under the sway of reason and
sound judgment. Make himself self
regulating, self-restraining. When a
man is thus reformed he will seek, and
will himself become a reformative
force in society."

THE SKY AS AN AGRICULTURIST.
Human ingenuity has utilized air,
earth and water. It has made the
thunderbolt its light footed page, and
set the very sun itself to draw pictures
for the benefit and delight of mankind.
Science with delicate and subtle hand,
and mysterious power works on un-
ceasingly, and from out the labora-
tories and dirty studies of the Savans
come from time to time wonderful
revelations which only tell of still
greater depths to be fathomed and
loftier heights to be scaled.

The last curious revelation from the
scientific world is made through the
Philadelphia Press, which says that
for ten years, Gen. A. J. Pleasanton
has been conducting scientific experi-
ments in regard to the chemical pow-
ers of the sunlight, or more especially
in reference to the magnetic, electric,
and thermic wonders of the violet ray
and its effect upon the growth of ve-
getation and animals. So long ago as
1863, Sir John Newton discovered that
the violet ray of the prism had the
greatest index of refraction, and Sir
John Herschel found that the chemi-
cal power of the solar ray is the great-
est in the violet ray. Taking these
facts with the fact of the permanent
and prevailing blue color of the sky,
so varying in intensity of color accord-
ing to season and latitude, General
Pleasanton has made a number of
practical experiments, which have
produced the most wonderful effects.
He built a graper, causing the violet
rays, by means of colored glass, to
fall upon the growing vines. The
young vines were set out, and at once
they commenced a most wonderful
growth, which has continued up to the
present time, a period of some ten
years. The first year some of the
vines grew more than forty feet in
length, and the second year they were
covered with bunches of grapes, bear-
ing some twelve hundred pounds.
This development astonished all who
saw it, as well it might, when we are
reminded that in the grape growing
countries, where grapes have been
growing for centuries, that a period of
from five to six years will elapse be-
fore a single bunch of grapes can be
produced from a young vine. Such a
growth in seventeen months was never
seen before. The next year these
vines produced some two thousand
pounds of grapes, and they have con-
tinued to bear large crops of fruit
without intermission for the last nine
years.

An experiment upon pigs was made
with a very gratifying result, and it
was found that those which had been
subjected to the influence of violet
rays developed faster and weighed
more than those exposed to the ordi-
nary sunlight. A most extraordinary
result was produced upon a puny Al-
derney bull calf, which was thought to
be too feeble to raise. When put un-
der the violet rays, in less than twenty
four hours a marked change took place,
and from that time on the develop-
ment of the animal was wonderful, he
manifesting great vivacity and full
masculine vigor. The same experi-
ments have been applied to poultry
with great success. One can scarcely
conceive of the immeasurable value of
this discovery to agricultural people.
And we know no good reason why
this influence may not be brought to
bear upon the human family—for the
invigorating of the constitutions of
invalids, for the rearing and develop-
ment of sick and feeble children. Al-
ready sun baths as they are called,
have been introduced into some of our
health establishments, Dr. Angell, of
New York, having one on the top of
his Turkish bath, on Madison avenue.
We must now have violet baths, and
in time, doubtless architects will so
arrange the introduction of these
mixed rays of light into our houses
that the occupants may derive the
greatest benefit from this influence. It
has long been known that the red ray
of light is heating, the yellow illumi-
nating, and the blue or violet in a re-
markable degree stimulating to the de-
velopment of vegetable life. Says

Gen. Pleasanton:
"From this discovery we can imagine
the immense influence which the in-
tensely blue color of the sky in the
equatorial regions has and always has
had in conjunction with the sun's
white light, and the heat and moisture
of those regions, upon the develop-
ment there of vegetable life. This in-
tensely blue color of the sky in the
Arctic regions may also serve to ex-
plain the exuberance of animal life
there."

"Humboldt said that he had never
seen the sky so blue, so intense as in
the tropics and under the equator.
Arctic navigators have also declared
that in the Arctic regions the intensity
of the blue color of the sky is amaz-
ing."

"On no part of our planet is the de-
velopment of vegetable life so grand,
so various, so excessive, and so con-
stant as in the tropics and in the
equatorial regions. While this won-
derful display of vegetation is observ-
ed in these regions, the exuberance of
animal life and the rapid growth of
vegetable life in the Arctic regions
are said to be unequaled in any other
part of the world."

Brick Pomeroy is the impersonation,
the quintessence of boiled down de-
mocracy, and the following is the style
of Anglo Saxon he uses in regard to
the high chiefs of that party, in the
superlatively democratic city of New
York. There is no mincing of words,
no evading issues, no lack of force in
doing the thing up strong in language
as plain, so that even the democra-
cy can understand it:

TAMMANY AND THE PRESIDENCY.
If the head Sacheme of Tammany
can manage to secure the nomination
of "their man" for the presidency, and
then see him elected, there will be in-
augurated the grandest administration
of theft, corruption profligacy, extrava-
gance and crime this country ever
witnessed.

The ring of swindlers, now holding
treacherous power in New York city
under the name of democracy, are do-
ing more to weaken the cause of de-
mocracy in the country at large than
the entire vote of the city can atone
for.

By the stealing of New York official
seals.

By the treachery and wanton sacri-
fice of democratic principles and gen-
eral interests by the leaders of tam-
many—

By the cowardice of the ring mas-
ters of New York, who have made the
flag of democracy but a rag to mark
the depository of stolen fortunes, and
the protection of such men as Hall,
Sweeney, Connolly and other bold
bears and plunderers—

By the corruptions in Judge Brain-
ard's court for the special protection
of the Erie railroad and magnificent
swindlers—

By the entire disregard of every
other interest in city or country ex-
cept the acquisition of power and ac-
cumulation of plunder, for the leaders
of Tammany—that once honest but
now rotten organization of thieves and
swindlers—are doing more to load and
drag down the honest democracy of
the land than to win national democ-
ratic victories.

The success of Tammany is the
plundering of the people—the endorse-
ment of wrong, ignorance and adminis-
trative imbecility. It is the elevating
of riot and disorder—the advance-
ment of the mob—disregard of law—
the jeopardizing of life and property
in New York city—the elevating of
gambliers, pimps, brotchel keepers,
prize fighters, loafers, murderers, pro-
fessional jurors, suborned judges, re-
porters, owners of rose wood hog
pens, mahogany barns, courts and
legislatures to that power which is no
power to save, protect or encourage
anything not corrupt, and in partner-
ship with the reckless crowd now with
hands thrust to the body in the pock-
ets of the tax payers.

This is Tammany!

This is so called democratic author-
ity governing New York!

This is the devil's combination of
thieves now ruling New York city and
state, not for the good of the many,
but for the enrichment of the few.

This is the monopoly of corruption-
ists now proposing to buy the nomi-
nation of the next democratic candidate
for the presidency, that Washington
may be included—that some of the
leading thieves of our New York of-
ficials may be transplanted to new
fields, but under the same manage-
ment.

It is for the democracy of the coun-
try to look to this—to send to the Na-
tional Convention of 1872 men who
dare be honest to taxpayers and to
principles, or there will be such a de-
feat, such a distribution and scattering
of the democracy as no power on
earth will ever rally.

Honest men will not always endorse
corruption.

New York, the pig pen of Tam-
many, may submit to what its people
have not pluck enough to help, but
the democracy of the country will not
submit to such dictation.

Look at New York!

One hundred and one millions of
dollars in debt.

And what have the people to show
for it?

A steam yacht!
An American Club House!
A race track!
A supreme court owned by the Erie
railroad, with Hon. George Barnard
toll keeper!

A palace for lying Slippery Dick
Connolly, the Comptroller, who went
into office so poor that he could not
qualify in a thousand dollars—who is
now a millionaire.

A fortune of ten millions for Peter
Bismarck Sweeney, was a poor man
when first appointed city chamber-
lain.

A palace for Hon. William M. Tweed,
the likeliest man in the lot, who has
only made twenty five millions of dol-
lars out of the city, by honesty and
economy, in ten years!

A fortune of seven millions for A.
Onkey Hall, the popinjay mayor, who
squawks when his masters pull the
string, and pockets his share of per-
centage of plunder while angling for
the nomination for governor!

Six thousand harlots and nineteen
hundred dens of infamy supported
directly from city stealings.

These are a few of the exhibits for
this enormous debt which must be paid
or repudiated.

The people cannot much longer
stand such management.

How can we charge republicans
with their crimes and keep silent con-
cerning the wanton disregard of life,
law and honor in New York city at
the hands of her Tammany leaders?

How can we urge the democrats of
different states to confide their great
interests of states and principles to
men who sacrifice, without the least
compunction of conscience, everything
sacred and broad in its principle, that
a few may be made rich, no matter at
what expense of purse, principle or
reputation of the many.

Thus Tammany means—Rob Many.
Let the democracy of the country,
so long on the defensive when charged
with offenses, see that under the
coming contest be entered under hope-
less intentions, that we may make the
campaign aggressive and therefore suc-
cessful.

Between Tammany thieves in New
York and Republican thieves in Wash-
ington there is no choice, and the ma-
jority of voters know it.

Tammany succeeds in the city by
fraud, violence and coajulation.

Curs is not that kind of democracy.

A Turkish recipe for a cement used
to fasten diamonds, and other precious
stones to metallic surfaces of polished
steel, although exposed to moisture is
as follows.

"Dissolve five or six bits of gum cas-
tic, each the size of a large pea, in as
much spirits of wine as will suffice to
render it a liquid. In another vessel,
dissolve in brandy as much isinglass,
previously softened in water, as will
make a two ounce vial of strong glue,
adding two small bits of gum amm-
oniac, which must be rubbed until dis-
solved. Then mix the whole with
heat. Keep it in a vial closely stop-
ped. When it is to be used set the
vial in boiling water.

A London watchmaker has con-
structed a gold hunting case watch
in addition to being a timekeeper of
the utmost precision, with chronomet-
er adjustments, compensation bal-
ance and cylindrical spring, exhibits
on the dial plate the following different
indications: First the equation of
time, second, the moon's age; third,
month of the year; fourth, the day of
the month in addition to the hours,
minutes, seconds, as in an ordinary
watch. The mechanism is so contriv-
ed that any one or the whole of the
hands may be set forward or back-
ward at pleasure without deranging
the rest. Every movement of this me-
chanical marvel is laid down in the
strictest proportion, and based on cy-
clical calculations, of an absolutely scientific
character, and the whole is with in
the compass of a pocket time keep-
er.

For the Independent.

**REPLY TO THE INFIDEL ATTACK
OF THE INDEPENDENT ON
CHRISTIANITY.**

(Continued.)

In order to show the indestructible
character of Christian principles, as the
strongest fortress which was ever
reared, and the vanity of all infidel at-
tacks of whatever form and shape, we
draw the attention of the public to the
following proof of a Supreme Being,
as an absolute, personal, supernatural,
conscious, self-existing, and self acting,
intelligent God; for infidelity never
can rest on real facts, but is only a
dissemination of the heart. This doctrine of a
Supreme Being is one of the principal
stones in the foundations of Christian-
ity, as it is also of all sound, real phi-
losophy. Whoever is forced to admit
the testimony for the existence of a
Supreme Being, a God in, but also
above the universe, he says, A in the
Christian alphabet of principles; and
as all others, as trinity, incarnation, re-
demption, revelation, salvation, &c.,
stand intimately connected with the
first one, like a chain of many links;
so the heliometer and confessor of A
must admit B, C, D, and finally come
and arrive at Z—that is to say more
plainly, the believer in a Supreme Be-
ing must finally admit and confess all
Christian principles, if he is upright
and consistent. Materialism cannot

reach to this intelligent standpoint, be-
cause it begins by saying matter is
part of God, and so it must stick in
the mud, as a creeping low thing. A
very great importance, then, rests on
the investigation of the testimony of
a Supreme Being.

As infidels do not admit testimony
from the Bible, but of nature alone,
we therefore state only from the Bible
what it understands by the term Su-
preme Being, but the proof of its ex-
istence we take from nature itself.

We

Again: 1 Corinth. VIII, 6; 6; But to us there is but one God, the Father, of whom are all things, and we in him." Also 1 Corinth. XII, 6; "But there are diversities of operations, but it is the same God that worketh all in all." We alone have a Creator and a creation, but not so of Materialism. Our God is independent and supreme whose will and power creates and destroys. He is above his work as the machinist is above the machine, and yet pervades everything and runs everything with his wise providence. This God alone is worth our intelligence and trust. Like a free Lord he appears with glorious majesty compared to the law and slave bound master of materialism. We conclude this comparison by saying with the apostle Paul: 1 Tim. I, 17: "Now unto the King eternal, immortal, invisible, the only wise God, be honor and glory forever." We have a God of perfect qualifications, whose footprints are seen in the whole universe, as we will now prove.

We commence with man as one of the most important works of God. 1. Man's conscience proves the existence of a Supreme Being, as taught by the Scripture. In our conscience is implanted a moral law, which tells every man to love God above all things, and our neighbors as ourselves. This law cannot be denied. It is the foundation of all virtue and holiness. Through this law God speaks to every man, and urges him to love God and neighbor, and at the same time judges every desire, thought, word or act of man, that rises up against these promptings of conscience, as sinful, and threatens him with punishment. This is a fact proved by the experience of all nations and generations, which could not be denied by a sane man. If any one would deny, his experience would contradict him and prove his denial an insane act. This moral law in the heart implies a moral governor. By following up the living stream we arrive at its fountain, so by following up the stream of conscience we arrive at a higher moral Supreme Being, the source of all virtue and goodness, and the great judge of all men and actions.

This moral law is independent from all other law in man, and is the innermost sanctuary. The physical laws that control the body are limited; the laws of the mind have a greater sway and a more elevated sphere, but is still limited and finite, and our moral law is not limited and finite, reaches to the infinite God, therefore its records of our life are imperishable, and its work here only a commencement of eternal operations. This moral law binds us all to the Supreme Being above us, with thousand strings, from which we can never cut loose, and if we would do so, its force would still be felt; but it binds us also over to the judgment of God, before which we must give an account. It is therefore foolishness to think that the earthly misfortunes of this life would settle our accounts with God and our conscience, and would leave nothing for the future; for God's nature will be always the same, the record of conscience will not perish, and if we die in opposition to him, there must be a day of judgment and a condemnation, just as true as two times two are four. Unbelief cannot change it, but God's mercy and grace can.

Just look at its operations as experience daily. Take, for example, the perception of conscience that deceit is a sin. Take the conviction that we are not at liberty to tell a lie when we might be tempted to do so. Take the judgment that the person who has committed the act is guilty, condemnable, punishable. Take the feeling of remorse, which rises when we contemplate ourselves as having told a falsehood, then you have a series of mental phenomena quite as real as our very sensations or ideas of pleasure and pain, or our taste of sweet or sour. If conscience then is a reality, it really is, then there is irrefutable proof of a moral Supreme Being, the judge of all.

What has materialism or any other kind of infidelity to say to this? Will they try to say to this, that conscience is a creature of man's own will, and they then forget, that experience shows that conscience is a constant correction of our will, and there is nothing from which a wicked man would like to get rid of so much, as an unbraiding conscience. It cannot originate out of reason, as it is the law, according to which reason reasons in moral matters. It is pre-existing to it and independent of it. It judges even our reasonings. It cannot but originate out of nature, as nature is unconscious of itself, and conscience, on the contrary is conscious of itself and its divine origin, and teaches us to a spiritual consciousness. It cannot originate out of association, or education, or custom, as it operates the same in all conditions and beliefs. We cannot control it in any way, but it controls us. It is therefore independent of everything else, and reflects as sure as it exists the independent moral Supreme Being, who sits by and through it the secrets of our hearts, and establishes his authority in the most binding manner within our persons; accuses, excuses our desires, thoughts, words or actions, as they are right or wrong. The great German philosopher, Kant, says of this moral law in his criticism of practical reason: "Two things create my admiration, the starry firmament above me, and the moral law within me." And the great, learned Cicero of ancient Roman times says de lege: "That was always the conviction of all truly wise men, that the oral law was not devised by man, or introduced by nations, but something eternal, according to which the whole world was to be regulated. The final cause rested therefore in God, who commands

and forbids. And this law is as old as the Spirit of God itself. Therefore is this law, on which all obligations rests in truth and of all the spirit of the highest divinity." (TO BE CONTINUED.)

The republicans will hold a public meeting in front of the American Hotel, Wednesday (this evening) August 30th, 1871.
GEN. RALPH P. BUCKLAND,
of Fremont, and
PROF. JAMES MONROE,
of Oberlin,

will address the meeting upon the issues of the day. This is the opening of the campaign and we call upon every voter to be on hand.

Simultaneously on Thursday last, the 21st inst., some 23 or 30 leading speakers in the republican ranks opened the election campaign at the same number of the principal cities in this state. The daily papers publish many of these speeches, and they are represented as being able and effective, and will wield a vast influence on the people. It is expected these public speakers will be kept before the people from now until the 10th of October. Lieut. Gov. Lee spoke on that day at Canton to a large audience of interested listeners.

The idea of narrow gauge railroads is about to be put into practical effect in this country. The Baldwin Locomotive Works, of Philadelphia, has constructed a locomotive to run on a three feet gauge road, which has been built, called the Denver and Rio Grande railroad. A late number of the American Artizan gives a somewhat detailed account of this locomotive. Its weight is 29,000 pounds, and will draw on a level, 512 tons, on a grade of 40 feet to the mile 164 tons. Freight cars for the same road will weigh 33,500 pounds, which will pull a big load.

McCook, the democratic candidate for governor of Ohio, has, in consequence of ill health, or overwork, retired from the canvass as a public speaker. It was rumored sensationally, that he was to be taken off the track as candidate, but this is not true. The O. S. Journal thinks it is unfortunate for the republican party that Gen. McCook has quit the stump, for his speeches were essentially useful in behalf of that party. Outside of his politics McCook is a pretty good fellow, and we hope he may be restored to health, but don't ever about him being elected governor.

THE NORTHERN OHIO FAIR.
We would again call attention to the great exhibition of the Northern Ohio Fair, beginning September 12th, and continuing for five days. It will undoubtedly be the greatest affair of the kind ever seen in the west. Present indications show that the programme offered by the Board of Managers, is far ahead of that offered at the last fair. Thirty eight thousand square feet of buildings have been added, giving ample space to exhibitors. Dining halls have been erected capable of feeding 30,000 a day. A third track has been laid on the Lake Shore Railway, capable of keeping an endless chain of cars moving all the while, thus being able to move any number of people.

One great feature of the Fair will be its valuable gallery of Painting that will be exhibited, containing, among others, Rossett's great picture of La Fayette visiting Washington at Mt. Vernon, also, some most elegant ones by Bierstadt.

We expect to see all our readers well represented at the fair, especially as the railroads will all carry at half fare.

For further particulars see advertisement in another column.

The possible adaptation of wind mills to more general use than those to which they are at present applied we learn from a paragraph in an exchange. We are told that the Democrat, of Medina, New York, uses wind power to run its printing presses. The wind wheel is of a new pattern, is very simple in its construction, rather ornamental, and not liable to get out of order. It is admirably adapted to pumping water, emptying and grinding flour, running cider mills, &c.

1871. THE SECOND. ONE MILLION OF LIVES
NORTHERN OHIO FAIR
WILL BE HELD IN CLEVELAND.
Sept. 12th, 13th, 14th, 15th & 16th, 1871.

PARLOR SUITS,
CHAMBER SETS,
BEDSTEADS, BUREAUS,
TABLES, LOUNGES,
SPRING BEDS,
PICTURE FRAMES

MATRASSES, &c.
Give us a Call,
as we are confident that our rates are as low

IF NOT A LITTLE LOWER,
than those of any other house.
TAYLOR CLAY & CO.
Massillon, Ohio.—423-4f

House and Lot for Sale!
The subscriber offers for sale his house and lot situated on the corner of Main and Grant streets, in that part of the city known as West Massillon. Location desirable—house entirely new containing six rooms. Lot 30 feet front on Main street, and 150 feet deep on Grant street. Profitable investment. Apply soon.
D. W. HUNTSMAN,
Massillon, July 25, 1871.—1f

BLANK LEASES FOR SALE.

ONE MILLION OF LIVES
SAVED!
It is one of the remarkable facts of this remarkable age, not merely that so many persons are victims of dyspepsia or indigestion, but it is the willing victims. Now we have not only a remedy to say that any one regards dyspepsia with favor, or feels disposed to rank it among the luxuries of life. Far from it. Those who have experienced its tortments would scout such an idea. All dread it, and would gladly dispense with its unpleasant familiarities. There are diseases more acute and painful, and which more frequently prove fatal; but none, the effects of which are more distressing to the body, if there is a wretched being in the world it is

A CONFIRMED DYSPETIC.
But it is not our intention to discuss the horrors of dyspepsia. To describe them (truthfully) is simply an impossibility. We have said that dyspepsia is perhaps the most universal of human diseases. This is emphatically the case in the United States. Whether this general prevalence is due to the character of the food, the method of its preparation, or the hasty manner in which it is usually swallowed, is not our province to explain. The great fact with which we are called to deal is this:

DYSPEPSIA PREVAILS
almost universally.
Nearly every other person you meet is a victim, and apparently willing one, for were this not the case, why so many sufferers, when a certain, speedy and safe remedy is within the reach of all who desire to avail themselves of it? But says a dyspeptic, What is this remedy? To which we reply, This great alleviator of human suffering is almost as easily obtained as the life-giving air. This acknowledged panacea is none other than

HOOFLAND'S GERMAN BITTERS.
Would you know more of the merits of this wonderful medicine than can be learned from the experience of a dyspeptic? Try it yourself, and you will find it to be the best of all remedies for the dyspeptic, then shunken faith in it.

LET IT BE REMEMBERED
first of all, that Hoofland's German Bitters is not a mere beverage.
It is not alcoholic in any sense of the term. They are composed entirely of the pure juice of vital principle of the human body, and are prepared by one of the ablest German chemists. The objections which hold with so much force against preparations of this class, namely, that a desire for intoxicating drinks is stimulated by their use, are not valid in case of the German Bitters. Their effects can be

BENEFICIAL ONLY
in all cases of the bilious system. Hoofland's German Bitters stand without an equal, acting promptly and vigorously on the liver; they remove its torpidity and cause healthy secretion of the bile. They impart vigor and strength to the tired and enervated patient, to feel like another being—in fact, giving him a new lease of life.

THEY PURIFY THE BLOOD,
cleansing the vital fluid of all harmful impurities and supplanting them with the elements of genuine healthfulness. In a word, they are a remedy for all diseases in which they cannot be safely and beneficially employed; but in the generally prevalent distressing and degraded disease, dyspepsia,

THEY STAND UNWAVERED.
Now, there are certain classes of persons to whom extreme bitters are not only invalid, but find it impossible to take them without positive discomfort. For such

HOOFLAND'S GERMAN TONIC
has been prepared. It is intended for use when slight alcoholic stimulation is required. This tonic contains all the ingredients of the Bitters, but so flavored as to remove the extreme bitterness.

HOOFLAND'S TONIC
aids with almost marvelous effect. It not only stimulates the flagging and wasting energies, but invigorates and permanently strengthens its action upon the liver and stomach, through the purifying action of the Bitters, which the same quantity taken is none the less certain. Indigestion, biliousness, physical or nervous prostration, yield readily to its potent influence. It gives strength to weakness, throws disorder to the winds, and starts the restored invalid upon a new and glorious career. But Dr. Hoofland's benediction to the human race are not confined to his celebrated

GERMAN BITTERS,
or his invaluable Tonic. He has prepared another medicine, which is rapidly winning its way to popular favor because of its intrinsic merits. This is

HOOFLAND'S PODOPHYLLIN PILLS
a perfect substitute for mercury, without any of mercury's evil qualities. These wonderful pills which are intended to act upon the liver, are mainly composed of Podophyllin, or the

VITAL PRINCIPLE OF MANDRAKE ROOT.
Now we desire the reader to distinctly understand that this extract of the Mandrake root is not a mere preparation of the Mandrake itself. It is the natural juice of the health giving plant in a perfectly pure, and highly concentrated form. Hence it is that two of the Podophyllin pills constitute a full dose of the medicinal properties of the Mandrake root.

ACTS DIRECTLY ON THE LIVER
stimulating its functions and causing it to make its biliary secretions in regular and proper quantities. The injurious results which invariably follow the use of mercury are entirely avoided by their use.

Possessing desirable qualities, the Podophyllin becomes invaluable as a

FAMILY MEDICINE
No household should be without them. They are perfectly safe, require but two for an ordinary dose, are prompt and efficient in action, and when used in connection with Dr. Hoofland's German Bitters, or Tonic, may be regarded as certain and reliable remedies of liver complaint, dyspepsia, or any of the disorders to which the system is ordinarily subject. The

PODOPHYLLIN PILLS
act upon the stomach and bowels, carrying off impurities, obstructions, while the Bitters or Tonic purify the blood.

DR. HOOFLAND'S GREEK OIL.
Cures rheumatism, neuralgia, toothache, chilblains, sprains, burns, pain in the back, and limbs, by external application.

It is a powerful remedy for all kinds of skin diseases, such as eczema, scabies, itching, and burning, and is especially adapted to the treatment of the face, neck, and scalp. It is a powerful remedy for all kinds of skin diseases, such as eczema, scabies, itching, and burning, and is especially adapted to the treatment of the face, neck, and scalp.

Address National Publishing Co. Chicago, Cincinnati, or St. Louis.

POPEERY.
The Ee of the Church and Republic.
What it has done. What it is doing and what it is about to do. Its power is despotic, ill ability, frauds, ruses, miracles, idolatry, persecutions. Its larried of our public schools and of civil and religious liberty, its horrid wickedness, and its New York Yoids.

A book that is a wand everywhere. We were once introduced at once, and we will pay them liberally for the same. McCarty, 130 Race St. Cincinnati, O.

JURUBEBA
WHAT IS IT?
It is a sure and perfect remedy for all diseases of the liver and spleen, enlargement or obstruction of intestines, urinary, uterine or abdominal organs, poverty or a want of blood, intermittent or remittent fevers, inflammation of the liver, dropsy, sluggish circulation of the blood, leucorrhoea, tumors, jaundice, scrofula, dyspepsia, ague and fevers or their concomitants.

Dr. Wells having become aware of the extraordinary medicinal properties of the south American plant, called

JURUBEBA
sent a special commission to that country to procure it in its native purity, and having found its wonderful curative properties to even exceed the anticipations formed by its great reputation, has concluded to offer it to the public in a form, and at a price, which he predicted and arranged for a regular monthly supply of this wonderful plant. He has spent much time in experimenting and investigating as to the most efficient preparation from it, for popular use, and has for some time used in his own practice with most happy results the official medicine now presented to the public as

Dr Wells' Extract of Jurubeba.
And he confidently recom mends it to every family as a household remedy which should be readily taken as a sure and efficient safeguard of the system and to animate and fortify all weak and lymphatic temperaments. John Q. Kellogg, Platt St. N. Y. Sole agent for the United States. Price one dollar per bottle. Send for circular.

HOLLIDAYSBURG SEMINARY.
HOLLIDAYSBURG PA.
CHEAP FARMS—CHEAP TRAVEL! Chicago, Rock Island and Pacific Railroad Company.

600,000 Acres Iowa choice Lands
This company is now offering for sale about six hundred thousand acres of the finest agricultural lands in the West. The company sells only to actual settlers, and the prices are exceedingly reasonable, ranging from \$5 to \$15 per acre—the average being about \$8. The greater part of these lands are situated along the line of its railroad between the cities of Des Moines and Council Bluffs, and are in the most accessible and fertile region in the state.

Sales made for cash or on credit long enough to enable any industrious man to pay for the land out of the crops.

These lands are held under a title direct from the General Government, and are not mortgaged or encumbered in any way. Full warranty deeds given to purchasers.

For maps, pamphlets, or other information respecting them, address EDENEER COOK, land commissioner, Davenport, Iowa.

Exploring tickets are sold at the company's office at Chicago, and at other principal stations on its line, and if the purchaser buys a land the amount paid for the ticket is applied on the purchase money.

DR. COLLINS

MASSILLON S. S. TEACHERS' INSTITUTE. The first meeting of the Institute will be held in the basement of the M. E. church, on Tuesday evening, Sept. 5th, commencing at 7 o'clock.

Order of exercises—1. Devotional exercises 15 minutes. 2. Addresses—The object and design of the institution. 3. The Teachers' Library—What books are essential for the Teachers. 4. Question Drawer. Each address 15 minutes. Short addresses on the general question 5 minutes. Answers to question drawer, 2 minutes. Each subject opened with an address is entitled to 30 minutes.

JOEL CORE, Sec'y.

Sunday School Anniversary.—The Christian Sunday School will hold its first anniversary at the Christian church on Sunday, September 3d, at 2 o'clock P. M. The friends of the school are invited to attend.

The school will also hold a picnic at the Mineral Springs, on Thursday of this week, August 31st—leave the church at 8 A. M. The parents of the children and friends are respectfully solicited to be present, and in making the occasion a pleasant one for the little folks.

STARK COUNTY FAIR. Begins at Canton, Tuesday, Sept. 20th, and continues four days.

The schools of this place, which are to begin next Monday, will be under direction of the following instructors: Prof. E. A. Jones, superintendent; high school—Misses Sarah Hoxworth and Sarah Folger; grammar—Misses Flora Richards and Emily Brainerd; secondary—boys department—Miss Hattie Humberger—girls department—Miss Minnie Butler; upper primary, Misses Carrie Rinnick and Rachel Parsons; lower primary, Miss Laura Bowen. West Massillon—grammar—principal, John Smith, assisted by Miss Sarah Brannan; secondary, Miss Julia Lowe; primary, Misses Mary Kelley and Anna Riley.

Pupils below the high school, who live on the west side of the canal will attend at the new school house.

The members of the colored band have received their instruments, and will soon be put in a course of instruction by their teacher, Mr. Kirk of Canton. When they get to work we shall have plenty of instrumental music—no less than three brass bands, one or two string bands, and a long list of fiddlers and all that sort.

It is a little curious—we have plenty of musical talent here, that is, voices and tastes which are competent to produce good vocal music, but when Mr. Korthauer asked aid of our singers for his concert there seemed to be none prepared to fill such places, and he had to go to Canton—it was the only thing he could do. There is no necessity why this should be so.

The last Minerva Commercial gives a somewhat detailed account of a destructive fire which took place in that town one night last week. The loss in buildings and other property is between \$2,000 and \$3,000, a portion of which is insured. It is intimated that the fire was the work of an incendiary. If so it is hoped the guilty may be caught and put where he belongs, and will be deprived of the power to do further mischief.

Kites and balloons—of the paper sort—have been the favorite outlets of the Young America ingenuity in this vicinity of late. Kites have ascended almost out of sight, and hot air balloons have gone heavenward, and moved off to get miles away from their place of starting. We have very frequent applications from Young America for old papers for the purpose of making kites. If we give two or three, it is surprising to see what a multitude of others will soon be on a similar errand. Should like to accommodate them, but our stock would soon be exhausted if we were to try to supply all demands.

Messrs. St John & Lang are about beginning to cook soap, and we expect that in a few days they will have some in market. They have almost everything ready to get to work, and when they do begin we hope they will be successful in their laudable enterprise.

The first annual meeting of the stockholders of the Massillon Driving Park Association was held at Young's Hall, Monday evening, Aug. 28th, 1871. The meeting was organized by appointing Geo. Russell, Esq., chairman, and J. E. Brown, Sec. The chairman then called on Col. Madison, who briefly stated that the amount of the stock had been raised within \$400.

The meeting then proceeded to election of officers, which on motion was made by acclamation, and resulted as follows: President, Clement Russell. Vice Pres., O. G. Madison. Treasurer, Jas. Hunt. Secretary, J. E. Brown.

BOARD OF DIRECTORS. P. G. Albright, J. P. Burton, Jas. Justus, Thos. Russell, Peter Gribble, Jas. Easley, R. B. Crawford, Edwin Bayless, Jas. McClurg, Lyman Davis, Peter Welker, A. C. Wales, James McLain.

On motion the president, vice president and secretary were included in the Board of Directors. On motion the Board of Directors were directed to meet at said Hall on Thursday evening, Aug. 31, 1871, to make further arrangements.

It was then moved that the meeting adjourn there being no further business before the house. J. C. BROWN, Sec.

We want about \$300 to get up a nice celebration of our fire department. For years past we have visited other places, and have taken many prizes, and as we have and expect to be at our posts in case of a fire. We would ask our business men to aid us in their ability.

As announced two weeks ago Gen. Ed. F. Schneider, of Canton, died on the 28th ult. at Dresden, Germany, whither he had gone to improve his health. The body of the deceased was returned to the home of his family, where it arrived, one day last week. It was enclosed in a richly finished coffin. The funeral took place on last Sunday afternoon, and was attended by a large number of friends. The masonic order took an active part in the ceremonies, as Gen. S. was a member, and the brotherhood formed quite a long procession, preceded by a company of zouaves, recently formed at Canton. The funeral ceremonies took place at the Lutheran church, from which the procession started for the cemetery, in the order above indicated, followed by a long line of carriages. The body was deposited in its final resting place, the usual observances of the fraternity being carried out at the grave. A large delegation of our citizens was at the funeral, most of whom went there on a special train.

As our friend, Mr. D. W. Huntsman, has left this place in order to establish himself in business in Allegheny City, it is fitting that we express regret at the loss of so useful, energetic and public spirited citizen. Although Mr. H. has, after commencing business here with a severe loss in the burning of his dwelling and much of its contents, and was much disheartened in consequence thereof, he was encouraged on every hand to continue his avocation, that of furnishing cabinet ware in all its varieties, upholstery, &c., and did so most successfully, so that his departure to be one of the well known places of business of this city. By years of industry, and unswerving integrity of character he has secured the esteem of all with whom he came in contact, thus laying a basis on which to build a name worthy to be remembered by his hosts of friends. As above intimated, all classes can but express regret at the removal of so worthy a man from our midst, and unite in wishing him that success he so richly deserves in his future field of labor. As a mechanic in his branch of labor, he has few superiors in skill, ingenuity and completeness of workmanship, in many of the difficult parts required, and as a business man is prompt, obliging and honorable in all his dealings. We would therefore commend Mr. Huntsman to the community in which he is about to establish himself, as a gentleman worthy of their respect, esteem and confidence.

Our old friend, J. P., of N. L., will see that the necessity of publishing his article is obviated, as it was anticipated by another writer. His suggestions, however, contain several pertinent points, but as the discussion is already pretty extensive for our columns, we feel compelled to add no more than can be avoided.

Notwithstanding the recent parching dry weather the promise for a glorious crop of corn bids fair. The stalks are of good height and generally loaded with large ears, not a small proportion having two or even more.

Dry and hot were the words in almost everybody's mouth up to last Friday. The ground in many places seemed parched, grass scorched out, corn suffering, and water becoming scarce generally. And it seemed to be so all over the country. Weather reports indicate but little rain, though for several days there seemed to be threatenings of falling weather. Friday the sun was invisible, and rain fell, not rapidly but steadily, for hours, so that the ground was pretty well saturated. More rain Saturday, and Sunday morning we had a strong northeaster, which poured down long and fast. It seemed as if the bung was out, and as we were to have a full share to make up for last time. The situation is worth considerable in the shape of growing vegetation.

The concert under the direction of Prof. H. O. C. Korthauer, on Thursday evening was a pleasant one, so far as the music contributed to that end. Not a large but generally appreciative audience listened with interest and attention to the excellent music, both vocal and instrumental. The singers, consisting of three ladies and two gentlemen, did their parts well, and on the piano, Mr. K. is one of the masters—so regarded by those who are considered judges. He is making the science as well as the art of music his life business, and although a young man has proved eminently successful. Quite a number of music loving ladies and gentlemen of Canton were present as attentive listeners and there ought to have been more of our own citizens present.

Embroidery cheap at Ricks.

Our readers will notice the call for a meeting this evening. The gentlemen who are billed for the occasion are men who have the ability to edify and entertain an audience. We suggest to all to turn out and hear what they have to say.

STARK COUNTY FAIR. Offers premiums for trading and packing horses and mares, from \$10 to \$100. Don't fail to attend the fair.

The Tennessee Agricultural, and Mechanical Association has issued a circular, in which all who feel interested are invited to be represented in a congress of various kindred societies all over the country, at Nashville, on the 3d of October next. The object is to form a national agricultural association. Manufacturers of agricultural implements throughout the country are invited to illustrate the value of their machinery and inventions, as the Tennessee state fair is to be held there at the same time. Full information can be had by addressing W. H. Jackson, Nashville, Tenn.

Good, sweet, ripe grapes can be had for eight cents a pound. Rather have the grapes at this rate than larger beer for nothing. God and nature made the grapes, and they are among the things that we all pronounce good; man or devil, or both, make lager beer, and all the good people as we think, pronounce it bad. It is said to be the essence of rotten barley, cooked up with drugs and other abominable compounds. Nothing of the sort comes out of the ground. It is rained from the sky. In comparing grapes and lager, therefore, we regard the former as a divine institution, and the latter as one of the inventions of old cleve, who has the credit of running the brimstone department. Grapes make nobody drunk, lager does, though some have to swallow a deal of it before the drunk comes—and it will come. Then lager is but a sort of precursor to stronger liquid poisons.

STARK COUNTY FAIR. Gives encouraging premiums for mares and colts, ranging from \$2 to \$10, depending on age, &c.

In Progress's article of last week the types made him say, "The Greek word in the New Testament translated which is Pauma, the precise meaning of which is mind or breath. The word Pauma should read Pneuma, and Mind or breath, Wind or breath."

We are informed that our fellow citizen, G. L. Ryder, who was at Pittsburgh last week, on business, accidentally fell through a trap door on which he stepped, not knowing that it was safe. The distance he fell was some twelve feet, and he was somewhat injured, we hope not seriously.

STARK COUNTY FAIR. offers a long list of premiums, many of them liberal in amount. \$15 to \$25 for best blooded draft horses—same for roadsters and horses for general purposes—\$10 to \$20 for draft horses, also, to roadsters and for all purposes.

The Fair for 1871, will commence on the 26th of September, and continue four days. As heretofore, the officers are determined to make it as attractive and entertaining as possible, and we are very confident that this fair will not fall behind former ones in this respect.

We are indebted to Mr. Alexander Simpson, president of the Carroll county Agricultural Society, for a complimentary to the annual fair, which takes place on the 26th 27th and 28th of September.

The Columbiana county fair begins on the 19th of September, and continues four days. They always have big fairs in that county, and this year bids fair to be no exception to the rule.

Our readers will see that Mr. Warwick has disposed of his large dry good store to Messrs. Altman, Grosse & Welter, three enterprising young men, who propose to continue the business at their well known stand. The people of this place are familiar with the place, and need no prompting to make business visits there.

Persons wanting beds filled with clean straw, or tomatoes to put up, will leave orders at C. N. Oberlin's.

Scarf opera flannel at Ricks' the cheapest in town.

Reported for the Independent.

COUNCIL PROCEEDINGS.

Wednesday Ev'g, Aug. 23, 1871.

Regular Session—G. L. Russell presiding.

Roll Call—Members present, Messrs. Russell, Mong, Ruchli, Bjallinger and Willenborg.

Minutes read and approved.

The Street Commissioner submitted his regular report for work done on streets and alleys for two weeks ending Aug. 19, to be \$108.63 and amount of poll tax performed \$93.00, amount of work done in excess of poll tax performed \$97.63.

A petition signed by G. Earl and thirty-three others was read, calling the attention of the city council to a piece of road in the corporate limits near the western line of Perry tp, on the old Wooster road, and asking that the same be graded. On motion of Mr. Willenborg the street and alley committee were instructed to fix the above mentioned piece of road immediately.

A petition from the Volcano Furnace Co. and 44 others was read, calling the attention of the council to the unsafe condition of the South street canal bridge, and asking that a substantial iron bridge be erected in place of the present unsafe structure. On motion of Mr. Willenborg the chair was authorized to appoint a committee to examine said bridge and report at the next meeting, the president appointed on said committee A. Mong, F. Willenborg and himself.

A bill of Garis & Baker for \$90 for stone and work on the little Sippo creek bridge on Summit street was read and referred to the committee on streets and alleys.

Joseph Jacobs also presented a bill for \$407.33, for work on the Muskingum street bridge, which was on motion accepted.

Orders were drawn on the treasurer as follows:

In favor of Jos Jacobs, to apply on above bill \$200 00

Peter Rute, on city paying, 50 00

There being no further business the council adjourned.

The number of white people in this country by the last census is set down at 34,405,641; colored 4,980,079; Indians, 25,684; Chinese, 58,980. Total, 39,370,384. According to these figures we all don't come up to 40,000,000. The poor Indian is dying out, there being not half as many as there are of Chinese. We were told, too, that the negroes if set free would die out, but with all the killing they suffered there are almost 5,000,000, as against something over 3,000,000 in 1860. They don't seem to be good at dying out at all. One report says there are 282,000 Indians, and even with this number they are dying out.

The critics of the women's political movement are masters of queer specimens of logic. They charge upon Mrs. Woodhull, who announces herself a candidate for president, that her marital relations are of an equivocal character. Suppose this charge is admitted—but the woman ought to be heard in her defense before she is condemned—does that implicate all engaged in b. half of this women's movement, as being loose in morals, free lovers, adulterers, fornicators, and all that? It would appear so according to their reasoning. Even Mr. Greeley, the great reformer, assumes that position, if we understand him. But this don't help the opposition any—it is too great an absurdity. It is just like the old proslavery party that party blindly assumed that all the negroes were a stupid, thriftless, lazy race, and needed the stimulus of the lash to make them useful, merely because a very small fraction of them were of that character. Who battled that ridiculous idea with more success than this same Mr. Greeley, who now assumes to condemn a whole organization because of the charged short coming of one of that party? We know of no better army from which to draw weapons against Mr. G's assumptions about the women's movement than his own elaborate, clear, logical and convincing arguments used so successfully against the proslavery party. These would completely annihilate his later attempts to overturn another reform which will prevail in spite of his opposition. Mr. Tilton effectually exterminates his sophistries on the question.

Any amount of censure has been uttered by the papers concerning that fearful accident, the explosion of the boiler of the ferry boat, Westfield, in New York city, a few Sundays ago, who eby more than one hundred lives were lost, and many others endangered. Many excuses and explanations were made, but at last it comes out that the engineer would get drunk—that plenty of beer kegs were on the boat at the time of the tragedy, and they were generally ascertained to be empty. It seems there is no evading the fact that intemperance—drunkenness—is the constant source of evil, and only evil continually. Who can blame us for inveighing against this great crime, especially when not one politician in a hundred has a word to say against it? and even but very few preachers of the Gospel—perhaps one in a dozen—warn the people of this fearful curse, which is and has long been upon us. Look over the crimes, accidents, suicides and the long catalogue of dark deeds, directly traceable to this prolific source of sorrow, shame and misery, and who that has the heart of a philanthropist can be indifferent, and calmly sit down and do nothing.

Three inches of rain fell on Sunday, Monday and Tuesday of this week, according to Dr. Watson's measurement. And still it comes.

It is broadly intimated by some of the papers that McCook is afflicted with the celebrated whisky sickness. If so it will rattle him, if he don't spend his days.

MOBILE, ALA., Aug. 28—Evening.—The steamer Ocean Wave left this city on Sunday morning, with about two hundred persons on board, for an excursion to Fish river, about twenty miles from the city. On the return trip the boat reached Point Clear at five o'clock, and was made fast. The boat and a part of the passengers went ashore, and after the lapse of half an hour the whistle was blown and all returned to the boat. They had just got on board when the boiler exploded with great force, followed by a rumbling, hissing sound, and fragment of the timber of the boat and metal boiler were blown in every direction. The forward part of the cabin was carried away, and the chimney fell upon the after cabin and crushed it. About sixty or seventy persons were killed or injured by the explosion. So far the bodies of eighteen dead, eight of whom are ladies, have been recovered. Twenty eight wounded persons were brought to the city, and one of them, a girl, has since died. Many of the passengers were little children. Captain William Eaton swam for some time with both legs broken. The boat reached him just too late and he went down. The two pilots were killed, the engineer and his wife severely injured. It is impossible to correctly estimate the loss of lives. By some it is supposed that at least thirty or forty persons are still buried in the debris of the wreck, or at the bottom of the bay.

Mr. A. C. WALKER, Dear Sir: It would meet your approval I would suggest, respectfully, that a joint canvass of the issues which divide the parties honoring us with a nomination for the state senate would assist the people in determining their choice of principles in the pending campaign. If this suggestion meets your approbation I would refer you to Messrs C. N. Oberlin, J. B. Estep and J. G. Warwick for the arrangement of any and all preliminaries. Very respectfully yours, L. L. LAMBORN.

Harper's Weekly has long since become a national institution. In addition to the large amount of reading matter it contains, the illustrations, especially those of Nast, are a great attraction. The last No. hits off the Tammany millionaires in vivid style, and shows up these grasping robbers, who have accumulated millions in a few years, by fraud and downright theft.

I can confidently say that Simmons' liver regulator has done me more good than all the medicine I ever used. I shall never be without it. John J. Allen, Bible County.

Delays are Dangerous—Mothers, as you love your offspring don't fail to use Mrs. Whitcomb's syrup for soothing children. Read the advertisement in another column. Ricks' have the largest lot of flannels of all kinds and selling them cheaper than any other house in town, call soon and see.

Debility and Emaciation.

Both result from the lack of ability to convert the food into nutriment. How uselessly, then, for a person suffering from these alarming symptoms to immediately resort to a remedy that will strengthen the stomach and digestive organs. For as soon as this desirable object has been accomplished the health improves, and the patient resumes his usual personal appearance. Hostetter's Stomach Bitters have attained a world wide reputation for such cases, and have been proven the safest and best means of removing constipation, toning the stomach, giving energy to the liver and relieving every symptom of nervousness and depression of spirits. Its cheering and beneficial effects are highly spoken of by thousands, who owe to its restoration to health. No restorative in the annals of medicine has attained the same popularity in the short space of time it has been before the public, or has won the high endorsement accorded to this excellent tonic. Many other preparations, purporting to be correctives and restoratives, have been tried, but none have succeeded in curing the debility and disease of the stomach. Certificates, almost without number, have been published, attesting its truly marvellous power in removing those painful and fearful diseases. At this it seems idle to do more than call attention to the great remedy of the age, in order to awaken public attention to its excellence. It is the only preparation of the kind that is reliable in all cases, and is therefore worthy of the consideration of the afflicted.

YARD EAST OF BRIDGE SHOP ON RAILROAD.

BOYS' RIGHTS.

Talk about the women and the darkeys, and all the rest of 'em; all are not so badly treated as the boys are. Ask any boy. I know a lot, and I can give you all the names. Ask 'em all. They'll tell you that to be a boy is to be somebody without a right in the world. You're to take all the sass that is given to you, and give none back 'cause you're a boy, and not a child. You are to pay full fare in the cars and omnibus, 'cause you're a boy; and never have a seat because you are a boy and not a man. Fat woman get in after it's all full and looks about her; every body looks at you. Old gentlemen says, "My son," reprovingly. Conductor says, "Come now, my boy." You've paid your sixpence. No matter, that's nothing. You've been on your legs, with bundles, all day. Who cares, you're a boy. Now, a horse has such a load given to him as he can carry, and a man won't take any more than he can walk under. Ask boys what grown folks think they can carry. There's no limit to it. Who doesn't know a boy who does a man's work well, and does it for a tenth of what a man would get for it? Who hasn't read an advertisement for a boy who writes a good hand, understands accounts, is willing to make himself useful; boards with his parents; is trustworthy; no objections to sitting up all night; not anxious for meals at regular hours; no impudence about him. The best recommendations required, and receive two dollars a week wages. Ask boys whether old fellows don't make as much fuss about such places as if they were doing you a favor that would set you up for life. Who wants a boy anywhere? Your sisters don't in the parlor. Your father don't; he always asks you whether you're not wanted to do something somewhere. You make your mother headache every time you come near her. Old women snap at you. Young men tease you, and give it to you if you tease back. Other fellows—it's because they are aggravated so, I know—always want to fight if they don't know you; and when ever you get a torn jacket or a black eye, you hear of it at home. You look back and wonder if you ever were that pretty little fellow in petticoats that every body stuffed with candy; and you wonder if you'll ever be a man, and be liked by the girls, and treated politely by the other fellows, and paid for your work, and allowed to do as you choose. And you make up your mind not to be a boy any longer than you can help it; and hear your grandfather or somebody complaining that there "are no boys now," and wonder if he remembers the life they led, that he don't consider it a subject of rejoicing. There's only one comfort in it all; boys will grow up, and when they do, they generally forget all they went through in youth, and make the boys of the day suffer just as they did.

ABOUT CENTS.

An article on the 'Red Cent' has been published very extensively lately, which was inaccurate in many particulars. A correspondent of the Philadelphia Press thus writes on the subject.

The first cent issued by the United States government was the Fugio or Franklin cent, said to have been designed by Benjamin Franklin.

This coin ordered by act of congress, July 5, 1793, has on obverse a sun dial, at the left the 'e' of 'Eure' at the right, '1793.' In exergue, 'Mind your business.' Reverse, an interlocking chain of thirteen links, representing the confederated states. A circular band within the chain with the legend, 'United States.' In the center of this band, in three lines, the motto 'We are one.' It is the size of the ordinary cents coined in later years.

The Washington cents of 1792, were not a regular issue, and there is not a single specimen of these private issues having the 'Must of Washington' on one side and thirteen links upon the other," as stated in your article. In 1793 the regular issues of cents (coined by the United States Mint, in this city) commenced, and the first cent bore on obverse the head of Liberty, with flowing locks; reverse, a chain of fifteen links, representing the States then composing the Union. There were at least a baker's dozen of types and varieties of the issue of 1793.

After the French liberty came the addition of liberty cap and pole, which in 1796 gave way for the "Fillet Head" (hair tied behind in a cue). This variety continued until 1807. The classic head, or classic dome with banded hair, appeared on the cents of 1808, and disappeared in 1816. A period of sixty three years has now elapsed since the fillet head cent made its appearance, instead of thirty or forty, as given in your article.

Signs and Tokens.—The Gridiron: To take down the gridiron from the nail where it is hanging, with the left hand, is a sign there will be a broil in the kitchen.

The Mirror: If a mirror is broken it is a sign that a good looking glass will be missed in that house.

A funeral: To meet a funeral procession is a sign of death.

Pocket Book: To lose a pocket book containing greenbacks is unlucky. Nails: If a woman cuts her nails every Monday it is lucky—for her husband.

Roosters: If you hear a rooster crow when you are in bed, and the clock strike five times at the same instant, it is a sign of matrimony.

An itching Ear: If you have an itching ear, tickle your nose, and you will have an itching there, and all luck will be averted.

• Dr. J. LONG.

Eclectic Physician,

Has located himself at Massillon, O., for the treatment of

Female & Chronic Diseases.

Office east of the Park, second door of Mr. Falke's new building.

All consultations and examinations of patients made free of charge.

Dr. Long examines and explains your disease without asking any questions. If he understands your case you know it, and can't be deceived. If he cannot tell your disease, and how you feel without asking questions he does not consider himself competent to treat your case. This is the criterion to go by, and patients should not be satisfied with any other. This is the only direct and positive evidence of my ability as a scientific physician, and by this standard I am willing to be judged.

A proper diagnosis of local disease, without constitutional symptoms, that is, not affecting the system generally, must depend upon the judgment of both patient and physician.

Give Dr. Long a call, and satisfy yourself whether he understands your cases sufficiently well to treat them successfully.

Dr. Long may be consulted in the German and English languages. Address letters, JAMES LONG, M. D., 371-1y Massillon, Ohio.

MONEY CANNOT BUY IT!

For Sight is Priceless.

THE DIAMOND SPECTACLES

WILL PRESERVE IT.

The Diamond Glasses,

Manufactured by J. E. Spencer & Co., N. Y.,

Which are now offered to the public, are pronounced by all the celebrated Opticians of the World to be the Most Perfect, Natural, Artificial help to the human eye ever known.

They are ground under their own supervision, from minute Crystal Pebbles, melted together, and derive their name, 'Diamond,' on account of their hardness and brilliancy.

THE SCIENTIFIC PRINCIPLE on which they are constructed brings the core or center of the lens directly in front of the eye, producing a clear and distinct vision, as in the natural, healthy sight, and preventing all unpleasant sensations, such as glimmering and wavering of sight, dizziness, &c., peculiar to all others in use.

They are Mounted in the Finest Manner in frames of the best quality, of all materials used for that purpose.

Their Finish and Durability cannot be surpassed.

CAUTION.—None genuine unless bearing their trade mark stamped on every frame.

JOSEPH COLEMAN, sole agent for Jeweler and Optician, Massillon, Ohio, from whom they can only be obtained. False goods are not supplied to peddlers at any price. 378-1y

TIME.

Go to COLEMAN'S and get the correct time, and look over his splendid stock of Gold and Silver Watches, Diamonds, and Rich Jewelry, Fancy Goods, &c.

Manhood: how Lost, how Restored.

Just published, a new edition of Dr. CULVERWELL'S Celebrated Essay on the radical cure, without medicine, of Seminal Weakness, or Sexual Involuntary Losses, Impotency, Mental and Physical Incapacity, Impairments to Marriage, etc.; also, Consumption, Epilepsy and Fits, induced by self-indulgence or sexual extravagance.

Price in a sealed envelope only six cents. The celebrated author, in this admirable essay, clearly demonstrates from a thirty years' successful practice that the alarming consequences of self-abuse may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain, and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.

This lecture should be in the hands of every youth and every man in the land. Sent under seal, in a plain envelope, to any address, postpaid on receipt of six cents or two post-pays.

Also, Dr. Culverwell's "Marriage Guide," price 25 cents.

Address the publishers, CHAS. J. C. KLINE & CO., 127 Bowley street New York P. O. Box 4,386.
